Office Action Summary	Application No. 09/890,411	Applicant(s) BACHL ET AL.	
	Examiner Jay M. Patidar	Art Unit 2862	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. This communication is in response to applicant's amendment received on November 28, 2003.

2. An English translation of the priority German application has not been received.

3. The disclosure is objected to because of the following informalities: In the brief description of drawings, "Figure 2" and "Figure 4" should be corrected to read as ---Figures 2a and 2b--- and ---Figures 4a and 4b--- respectively.

Appropriate correction is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18,23-24,30,33,35 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0,884,525.

'525 discloses an illumination apparatus having an optical waveguide 17, at least one light source 22, a housing formed as a shell from a plurality of interconnected shell elements (Note Figs. 2,4) wherein shell walls are reflective walls.

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 19-22,25,28-29,31-32,34,36,37 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0,884,525 in view of JP 10-188641.

'525 discloses an illumination apparatus as explained above except for a second cavity. '641 is cited to show this feature. '641 discloses a second cavity with circuit components in it, a second light source and over a bridge (Note figs. 2 and 4). The snap fit structure and convex wall would be within the level of ordinary skilled in the art. Consequently, it would have been obvious to one having ordinary skilled in the art at the time the invention was made to modify the device of '525 to have included a second light source other side of the bridge away from the first light source as taught by '641 to increase light incident efficiency. The method claims recited for using the apparatus are an inherent use of the apparatus of '525 in view of '641 and are rejected on the same grounds.

One of ordinary skill would find it inherent that the apparatus of '525 modified with '641 operates in the functional manner claimed by applicant.

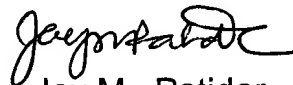

6. Claims 26-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
